Education

BSc Computer Science, Honours - University of Alberta

C/O 2025 *Grade: 3.9/4.0*

Experience

Judgment Labs

Research Engineer

February 2026 - Present

Noemon

Machine Learning Engineer

October 2025 - January 2026

- Developed an ARC-AGI-2 refinement solver with a ReAct approach on the Pareto frontier
- Created a context compaction technique improving 20% on the open source SoTA

fr8 Cohort 1.0

June 2025 - August 2025

- Developed the [Factorio Learning Environment](#): an open-ended benchmark for LLM agents

Data-Driven Network and Cyber Security (DANS) Lab

Undergraduate Research Assistant

September 2024 - June 2025

- Finetuned Qwen2.5, Llama 3, and DeepSeek R1 7-8B models with unsloth for provenance graph construction
- Performed adaptive anomaly detection locally on system logs with equivalent performance to GPT-4o

MANGA NLP Lab

Undergraduate Research Assistant

January 2025 - April 2025

- Re-implemented Flora: a low-rank adaptation optimizer using random projections for gradient compression
- Empirical training speed increases up to 25% compared to LoRA w/ AdamW in 3B and 7B parameter LLMs

Hochschule für Technik und Wirtschaft Dresden

Summer Research Intern

May 2023 - August 2023

- DAAD RISE Intern in reinforcement learning on the 7-DOF Franka Emika Robot arm
- Trained using Nvidia Omniverse Isaac Sim to perform block manipulation tasks using TRPO and PPO

Projects

OpenClaw Course

February 2026

- Tutorial on setting up an autonomous agent & messaging gateway with Open Claw; 250k+ views

Pipeline Parallelism from Scratch

January 2026

nanochat from Scratch

October 2025

- Re-implemented and trained nanochat on an 8XH100 node with DeepSpeed ZeRO-2

Hugging Face Ultra Scale Playbook Series

June 2025

- Created a [16-part video series](#) covering the Hugging Face Ultra Scale Playbook to teach myself large-scale GPU orchestration through teaching others, recognized by Hugging Face CSO Thomas Wolf

Founder - UofA Run Club (UofARC)

August 2024 - April 2025

- Created a weekly run club to gather community members together bright and early

Founder - UofACarpool

March 2024 - April 2025

- Wrote algorithm and website for matching service that pairs university commuters to carpool together
- Featured on the [University Newspaper](#)

Interests

- Avid language learner (French and German) and runner (longest distance: 50 kilometers)
